June 2010

Dear Parent/Guardian:

This is to inform you that your son/daughter has been given a summer assignment in mathematics. All students going into grades 6 through 8 during the 2010-2011 school year will be given summer work in mathematics. A copy of this assignment is also available on the school district website, www.dumontnj.org for your convenience.

The purpose of the assignment is for students to practice previously learned material based on the New Jersey Core Curriculum Content Standards for the completed grade level. This assignment is due on the first day of school and will count as a homework grade. Students will review the concepts covered in the summer assignment during the first week of school and will be assessed on these concepts during the second week of school. Students are encouraged to complete the assignment during the summer months in order to adequately prepare for the impending assessment. Teachers will be available for extra help prior to the assessment in addition to the time spent during class reviewing the concepts.

Have a healthy, enjoyable summer and we look forward to working with your child next school year.

Sincerely,

Shannon L. Warnock
Supervisor of Mathematics and Science
